BURBANK, CA 91505

Job Application for Robotics Engineer

Dear Mr./Ms./Dr. Duck,

Drip-Along Daffy's 'ma name! (men quietly play cards, unaware of Daffy's pronouncements) Anybody care to shoot it out? Man to man? Under western skies? West of the Pecos? Tumbleweeds at ten paces? (starting to realize no one is caring) Ten thousand head the cattle? (with less and less conviction) Cut 'em off at the pass? Prairies? Lariats? (after a pause) Anyone for tennis? (no reaction) Anybody? (changing to personal enjoyment) Well, reckon I'll have me a little bracer!

Oh, people call me Daffy, they say that I am gooney. Just because I'm happy is no sign I'm Looney Tuney. When they call me nutsy, that sure gives me a pain. Please pass the ketchup, I think it's going to rain. Oh, you can't bounce a meatball, though try with all your might. Turn on the radio, I want to fly a kite! Good evening, frieeeeeeeeends...

Starting from where we are we go 33,600 turbo miles due up. Then west in an arc-deviation to here. Then following the Great Circle several radiolubes south by down-east. By astro-astroble to here, here, and here, then by space navigal compass to here, here and then to here, and here. By thirteen point strato-cumulus going four million light years and THUS to our destination.

Sincerely,

Abhishek Venkataraman
